EDUCATION

Virginia Tech, Blacksburg, VA

Ph.D. in Economics

Expected May. 2022

Master of Arts in Economics

Dec. 2018

University of California, Santa Barbara, Santa Barbara, CA

Master of Arts in Statistics Jun. 2017

Kansas State University, Manhattan, KS

Bachelor of Arts in Economics (Magna Cum Laude)

May. 2015
Statistics Minor

Dec. 2014

RESEARCH INTERESTS

Experimental Economics, Behavioral Economics, Econometrics, Game Theory, Decision Theory

WORKING PAPERS

- 1. Group Size Effect in Sequential Multi-Battle Contests: An Experiment Study, with Yichuan Cai
- 2. A General Beta-Delta Discounting Model

WORK IN PROGRESS

- 1. New Hampshire or Super Tuesday, Does the Weight Matter?, with Yichuan Cai with Dr. Dongwoo Lee
- 2. A Machine Learning Approach on the Profit of Insider Trading, with Zhenyu Zhang

ACADEMIC AND RESEARCH RELATED WORKING EXPERIENCE

Department of Economics, Virginia Tech

• Instructor

Principles of Microeconomics (Econ 2005)

Spring 2022, Spring 2020

• Teaching Assistant

Behavioral Economic Theory (Econ 6014)	Fall 2021
The Theory of Games and Economic Behavior (Econ 4424)	Fall 2021
Analysis of Economic Data (Econ 3254)	Spring 2021
Economic History of Diversity and Inclusion (Econ 1214)	Spring 2021
Experimental Economics (Econ 4434)	Fall 2020
Neuroeconmics (Econ/Neur/Psyc 4454)	Fall 2019
Economics of Regulation (Econ 3004)	Fall 2019, Spring 2019, Fall 2018
Principles of Macroeconomics (Econ 2006)	Spring 2018, Fall 2017
Principles of Microeconomics (Econ 2005)	Spring 2018, Fall 2017

• Research Assistant

The Policy Destination Area	(COVID-19 databases project)	Summer 2020
Neuromodulation of the rTP	and Economic Preferences for Giving	Summer 2019

Department of Statistics and Applied Probability, University of California, Santa Barbara

• Head Teaching Assistant

Regression Analysis (Pstat 126)
Probability and Statistics III (Pstat 120C)

Fall 2016

Summer 2016

• Teaching Assistant

Statistical Machine Learning (Pstat 131/231)
Statistics for Economics (Pstat 109)
Intro to Statistics (Pstat 5A)
Spring 2017, Winter 2017
Spring 2016
Winter 2016, Fall 2015

• Statistical Consultant at StatLab

Statistical Consulting for verity of research from the Department of Molecular, Cellular, Developmental Biology.

Winter 2017, Fall 2016, Spring 2016

Department of Economics, Kansas State University

• Undergraduate Teaching Assistant

Intermediate Microeconomics (Econ 520)	Spring 2015
Sports Economics (ECON 524)	Fall 2014
Principles of Macroeconomics (Econ 120)	Spring 2014
Principles of Microeconomics (Econ 110)	Fall 2013

RESEARCH RELATED SKILLS

Computer Skills

R, Python, Stata, MATLAB, SAS, Minitab, SPSS, LaTeX, and JavaScript.

Statistics Skills

Econometrics, Data visualization, Experimental design, Sampling technique, Linear model, Generalized linear model, Nonlinear model, Multivariate analysis, Machine learning, Model validation, Nonparametric statistics, Bayesian inference, Time series analysis, Stochastic process, Artificial neural network, Generalized method of moments

Certifications

Specific Human Subjects Protection Training Certificate (VT)

Certificate of Teaching Effectiveness (VT)

Certificate of Social and Behavioral Research (CITI Program)

Languages

Mandarin Chinese (Native speaker)

English (Full professional proficiency)

Honors, Awards and Scholarships

Graduate Teaching Assistantship (VT)	2017 - 2021
Graduate Research Assistantship (VT)	Summer 2020, Summer 2019
Graduate Teaching Assistantship (UCSB)	2015 - 2017
Outstanding Graduating Senior of Department of Economics (K-State)	Spring 2015
LeVelle Wood Scholarship Fund (K-State)	2013-2015
Ross Alan Haymaker Family Economics Scholarship (K-State)	2014-2015
K-state Semester Honor (K-State)	2011-2015
Outstanding Junior Honors Award from the Honor Society of Agriculture	(K-State) Spring 2014
Anna Maude Smith Fund for Student in Home Economics (K-State)	Spring 2014
Margaret Haupt Swift Memorial Scholarship (K-State)	Fall 2013
Honor from College of Human Ecology (K-State)	2012 - 2013

JOB MARKET PAPER

"Group Size Effect in Sequential Multi-Battle Contests: An Experiment Study", with Yichuan Cai

This paper presents the result of a laboratory experiment that investigates the group size effect in the sequential multi-battle contest. We first generalized Konrad and Kovenock's (2009) result to multi-player $(n \ge 2)$. Then we conducted an n-player (n = 3 or 6) multi-battle experiment to compare the all-pay auction and the Tullock lottery side by side. When the number of contestants is increased in a sequential multi-battle contest, we get the following result: First, in battle 1, the boundary distribution is distorted in the all-pay auction, but only the no entry rate is increased in the Tullock lottery. Second, when the players are not in the lead, the dropout rate is higher with more players in the game. Third, even though the total number of battles has not increased significantly due to the increased number of players, more players are adopting the dormant-reenter strategy. Finally, increasing the number of contestants results in a higher total contest effort and a higher winner individual effort. In general, the theory in the Tullock lottery provides a more accurate prediction than in the all-pay auction.
